- 58 Attractions
- 6 Hotels
- 12 countries
- 3 Continents

MERLIN ENTERTAINMENTS GROUP

WHERE WE CURRENTLY OPERATE

	GERMANY - 15		IRELAND	
		FINLAND		
	UK - 22		SPAIN	
	DENMARK - 2	FRANCE	ITALY - 3	
			BELGIUM - 2	
	NETHERLANDS - 2			
	CHINA - 2		USA - 6	

MERLIN ENTERTAINMENTS GROUP

MEG BRANDS

The MEG Brands section displays a variety of logos for Merlin Entertainment's brands. These include Warwick Castle, Alton Towers, Legoland, Sea-Life, Gardaland, Heide Park, and the London Eye. Other logos shown are Earth Explorer, The Dungeons, Madame Tussauds, Sea Life Sanctuaries, and Gardaland Waterpark.

301 RIDES ACROSS THE ESTATE

SAFETY IS OUR NUMBER ONE PRIORITY!

OUR PHILOSOPHY

- PREVENTION
- CONTINUOUS IMPROVEMENT

“.....For the avoidance of doubt, we will never allow profit considerations to come before identified Health and Safety needs or requirements.....”

Peter Phillipson – Non-Executive Chairman

Nick Varney - CEO

HEALTH, SAFETY & SECURITY POLICY – OCT 2007

- **WHAT?**
 - Reportable Incidents
 - Minor Incidents
 - Near Misses

- **WHO?**
- **CAUSE?**
- **EFFECT?**

- **INCIDENT RATES**

IT'S A PIG OF A JOB

Welcome to Incident Tracker

Hours and People data: The system set-up allows hours and People data to be input at the Site/Zone level. This is the standard approach on Incident Tracker, however, we do not track down our data below location level, so you only need to enter the hours and people data once, in one entry point, each month. Otherwise, we will be duplicating the numbers when we run Incident data reports. For ITP data please input these under 'Number of' only. For other sites, please choose the target Sub-site. Although this will mean that there will be red crosses each month under the Hours/People data section, where you haven't entered any numbers, this will not be a problem.

Investigation Report: We plan to use the Part 2 of our standard Accident Report Form and this will be loaded into the system profile. This will be sufficient for the time being, as all of the other info required on the Incident Form is covered in the main part of the Incident Tracker input. As you will have seen, the Search feature is pretty powerful, and it can search on key words in your Incident Reports, so we hope you find it useful.

Monthly Reports: We are just in the process of finalising our monthly reports, which will be loaded into the system when they are completed. These will allow us to split out the Hours and Employee numbers as we do now in the ITP reports. We will also show what comes out of the system for the month of 100 with your normal TUI return. The aim is to show the TUI report from June onwards, as you should be operating all incidents into Tracker by then.

BENEFITS OF THE REPORTING SYSTEM

- Analysis → understanding
- Identify 'hot spots' → follow up action & prevention
- Prevent near misses and minor injuries leading to a major one
- supports culture of Prevention

Serious or disabling injuries

Minor injuries

Accidents causing damage

Near Miss incidents

Frank Bird
