

Operations Institute: Certified Haunted Attraction Operator Safety program– Code Compliance, Fire and Safety Issues
Includes Field Trip to Universal Studio Orlando’s Halloween Horror Nights

In cooperation with the International Association of Haunted Attractions (IAHA) and the Mobile Midway Safety Institute (M.M.S.I.) IAAPA presents the *Certified Haunted Attraction Operator Safety* program. The program will focus on code compliance and fire and safety issues for haunted attractions and will include a site visit to one of Universal Studios’ *Halloween Horror Nights* haunted attractions. It will demonstrate to haunted attractions operators, the importance of taking a long term or year-round approach to safety and maintenance planning.

The program will provide an overview of the current standards pertaining to haunted attractions including ASTM and NFPA. It will detail the operations requirements for a haunted or walk-through attraction including: automatic sprinklers systems, temporary or permanent water supply, smoke detection devices, alarm systems, illumination and exit markings and Class A interior finishes. The course will also consider inspection requirements, how to identify and correct hazards, and how to comply with established operating standards.

The course will end with a field trip to Universal Studios Halloween Horror Nights where attendees will visit a number of haunted houses as well as hear a presentation by Universal Studios entertainment production staff on how they produce Halloween Horror Nights.

Date:
Thursday November 20, 02008
1:00 p.m. – 4:15 p.m. Classroom study
4:30 p.m. – 8:30 p.m. Field Trip
